[docs] Tabla baseline vs candidato por pregunta con interpretación

2 participants

smuciton commented last week

Collaborator

Closes #100

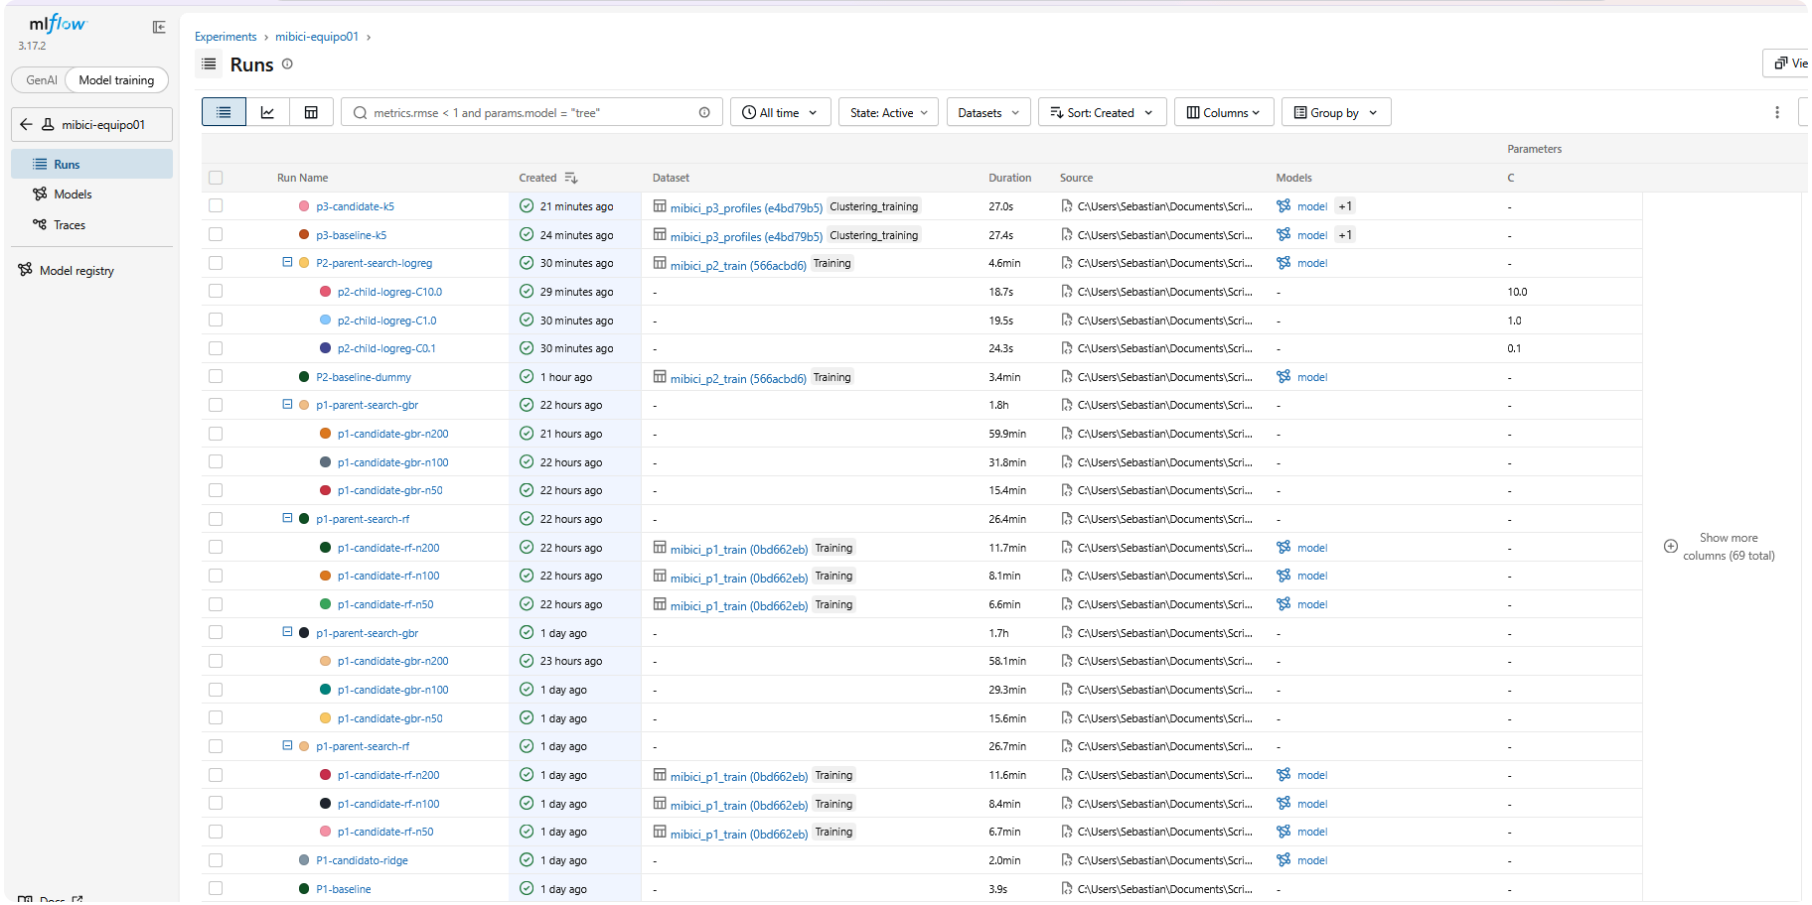

- Agrega `reports/baseline_vs_candidato.md` con una tabla por pregunta, métricas de validación y test, delta en porcentaje e interpretación.
- Enlaza el reporte desde el README.
- Corrige el docstring de `test_reproducibilidad.py` que llamaba baseline a Ridge.

Las métricas salen de los runs del commit `97b7e22` con mis datos locales (Parquet `ed2f4783`).

`pytest` : 67 pruebas pasan.
